

eControl Panel

The eControl with single or dual channel is used for controlling the following parameters: pH, redox, chlorine, ppm.

- Compact dimensions (300x260mm)
- Easy installation
- Pre-assembled eControl
- Controlled power socket via eControl
- Panel is suitable to control a metering pump with 230V / 1-phase

By using the panel a commissioning of pH, Redox, Cl or ppm monitoring in short time without too much effort.
